

This scatter plot displays the distribution of training data points. The x-axis is labeled 'Feature 1' and ranges from approximately -8.5 to 10.5, with major ticks at -7.5, -5.0, -2.5, 0.0, 2.5, 5.0, 7.5, and 10.0. The y-axis is labeled 'Feature 2' and ranges from approximately -1.5 to 10.5, with major ticks at -1.5, 0.0, 1.5, 3.0, 4.5, 6.0, 7.5, and 9.0. A legend in the top-left corner identifies blue dots as 'Normal (Train)' and red crosses as 'Outliers (Train)'. The normal data points are tightly clustered in the top-right corner, while the outliers are scattered across the plot area.
